PROFESSIONAL SUMMARY

Highly motivated and results-driven professional with 5+ years of experience in full-stack development, specializing in scalable cloud architectures and agile methodologies. Proven ability to lead complex projects from concept to deployment, ensuring high performance and user satisfaction. Seeking to leverage expertise in a challenging and growth-oriented environment.

Skills

• Programming Languages: Python, JavaScript (ES6+), Java, C++

• Frameworks: React, Node.js, Spring Boot, Django

• Databases: PostgreSQL, MongoDB, MySQL

• Cloud DevOps: AWS (EC2, S3, Lambda), Docker, Kubernetes, CI/CD

• Methodologies: Agile, Scrum, TDD

Experience

Senior Software Engineer — Tech Innovators Inc. (January 2020 - Present)
Bangalore

- Led a team of 5 engineers in developing and deploying a microservices architecture using Python and AWS Lambda, improving system scalability by 40%.

- Designed and implemented a high-availability data pipeline utilizing PostgreSQL and Kafka, handling over 1 million transactions daily.

- Mentored junior developers, standardized code review processes, and ensured adherence to best practices, resulting in a 15% reduction in production bugs.

PROJECTS

Distributed Task Scheduler — (Tech: Python, Celery, Redis, Docker)
Developed a highly reliable distributed task queue system capable of managing asynchronous jobs and scheduled tasks across multiple workers.
Impact: Improved internal service processing efficiency by 30% and reduced latency for long-running batch jobs.

Education

Master of Science in Computer Science, University of Technology, Kochi (2018)
3.8/4.0 GPA
